

## Introduction and support package: Guidance on the Terminology used in ISO 9001 and ISO 9004

Document ISO/TC 176/SC 2/N 526R2  
October 2008

### 1. Introduction

Great care has been taken during the development of ISO 9001 and ISO 9004 to use the correct English words and terms to describe their concepts and requirements, to assist in their readability and translation. The objective is to use simple technically accurate terms, and to the greatest extent possible, rely on common dictionary definitions. As with most technical subjects, there are some terms that have a very specific meaning different from the common dictionary one; in such cases, the appropriate technical definition is provided in one of the following:

- [ISO 9000:2005, \*Quality management systems - Fundamentals and Vocabulary\*](#)
- [ISO/IEC Guide 2:2004, \*Standardization and related activities – General vocabulary\*](#)
- [ISO/IEC Directives - Part 2:2004, \*Rules for the Structure and drafting of International Standards\*](#)
- [ISO/IEC Guide 99:2007, \*International Vocabulary of Metrology – Basic and General Concepts and Associated Terms \(VIM\)\*](#)

In all other cases, for the purpose of this guidance, definitions are selected from the Concise Oxford Dictionary. Definitions in ISO 9000:2005 have normative status, which takes precedence over their common dictionary definitions.

The table below provides the selected dictionary definitions for common words, which should be applied when using the standards.

### 2. Table of important words and terms used in the ISO 9000 family of Standards

Word	Form	Meaning
accordance	noun	(In accordance with) in a manner conforming with
activity	noun	something done in pursuit of an objective
adequacy	noun	sufficiency to satisfy a requirement or meet a need
adjustment	noun	operation of bringing a measuring instrument into a state of performance suitable for its use [VIM]
analysis	noun	Detailed examination of the elements or structure of something
